

THE ELECTRIC COOPERATIVE NETWORK

From powering homes in rural communities to supporting businesses and schools, America's electric cooperatives play a vital role in keeping the country connected and moving forward. These member-owned utilities are more than energy providers—they are partners in building stronger communities.

As part of this nationwide network, SEI REMC provides reliable service across seven southeastern Indiana counties, reaching more than 28,000 members and carrying forward the cooperative mission of service, connection, and community.

As we celebrate National Co-op Month, we are reminded that the strength of the cooperative model lies in its people—members working together to create a brighter future. Every vote in our elections, every conversation with our team, and every program supported through initiatives like Operation RoundUp reflects the power of cooperation. When members are engaged, the entire community benefits through stronger service, smarter investments, and a shared commitment to improving quality of life. Together, we are not only keeping the lights on but also ensuring that southeastern Indiana continues to grow and thrive for generations to come.
